QUALITY POLICY

Circle-C Energy Controls is an Australian company specialising in the design, development and manufacture of a large range of transformers, reactors, voltage transformers, metering units, current transformers, inductors, rectifiers and other electrical equipment of low and high voltage applications.

Our objectives are to provide safe and reliable products and services, and support our customers in a timely and cost effective manner. In doing so, a framework is established to meet the following objectives,

- Identify new products and market opportunities appropriate to Circle-C Energy Controls' customers' needs within applicable statutory and regulatory requirements. Thus strategically aiming to be uniquely positioned within Australia and overseas markets.
- Establish a framework for quality objectives aiming to enhance customer satisfaction through effective application of the elements of the overall quality system.
- Committed to satisfy the overall elements of ISO 9001 including statutory and regulatory requirements.
- Committed to continually review and improve the quality management system and its processes.

As Group General Manager, I am fully committed to the implementation and maintenance of a Quality Management System that complies with the requirements of AS/NZS ISO 9001. The system shall be structured to enable continuous review and improvement within the operations, thereby achieving customer satisfaction.

Continuous improvement is the responsibility of Circle-C Transformers' employees as well, and to achieve this, top management has developed quality awareness programs through education and training.

Tony Hogg
Group General Manager
Circle-C Energy Controls
